

# Nature Mandalas

Use natural materials that have fallen to the ground, so don't pick any flowers or branches! Start to create a simple pattern or shape by placing a larger object in the middle. Next, let the shape expand outwards by creating rings or layers. The nature mandala art emerges and grows through the process. Select and add different objects for their size, texture, or colour. Leave your artwork where you created it so that others can see and enjoy your beautiful creation.
