

Nature Weaving

You'll need:

- 🌿 Scraps of cardboard, 5"x7" is perfect!
- ✂️ Scissors
- 🧶 String, yarn, or elastic bands
- 🧴 Tape

Make a loom

1. Cut cardboard into a manageable rectangle, about 5"x7".
2. Cut 1/2" long slits along each end, spaced about 1/2" apart.
3. Wind your string, yarn, or elastics around the cardboard through the notches. Tape the beginning and end of the string or tie in place. The string should be tight but make sure the cardboard doesn't buckle.

Start weaving

1. Now for the fun part! Go outside and collect natural items that have blown onto the ground to weave like: long blades of grass, flowers, leaves, sticks, etc..
2. Weave your nature findings over and under the yarn, from one side to the other, looping back at each end if possible.
